Ipomea Pearly Gates

See Illustration

Silver Medal Winner in the 1942 All-America Selections. Ipomea, Pearly Gates is seemingly identical in growth, foliage and bloom, except white in color, with Clark's Early Heavenly Blue. Trade Pkt.....\$0.50 1/4 oz.....\$0.65 Oz.....\$2.00

Marigold

Dwarf French Double Butterball

Very attractive, compact, scabious flowered canary yellow in color, Butterball should make an ideal pot plant, as it is only 6 to 10 inches in height, uniform in size, very early and continuous flowering. Bronze Medal Winner in the 1942 All-America Trials.

Trade Pkt.....\$0.50 1/4 oz.....\$0.75 Oz.....\$2.00

Petunia Hybrida Mars

Deep, velvety crimson in color, Mars is a color which will hold its own anywhere, and one that will be particularly outstanding for bedding and mass effect. Deeper than Flaming Velvet, and a larger flower than any other in the hybrida group. Mars will find a ready sale by the discriminate grower.

Trade Pkt.....\$0.50 1/4 oz.....\$2.00

Petunia Giants of California

Glamour

A luscious shade of salmon rose, delicately veined brown in the creamy open shallow throat. The blooms are extremely large, 5 to 6 inches in diameter, with a shallow open throat surrounded by satiny petals which are heavily ruffled. The huge strikingly beautiful flowers are freely produced on strong growing richly foliated plants which will be 1 1/2 ft. to 2 ft. tall by the end of the season, although the first flowers are produced when the plants are only 5 inches to 6 inches tall.

Phlox Gigantea Red Glory

Here is the brightest color ever seen in Phlox, being a brilliant red with a large creamy white eye, which seems to intensify the red into an unbelievable sharpness. Red Glory is identical in type, habit of growth, and size of bloom to Gigantea Art Shades, and the other two separate colors, Salmon Glory and Rosy Morn.

Kalanchoe "Tom Thumb"

(As illustrated on front cover)

Two years ago a variation of *Kalanchoe Coccinea* was introduced under the name of *Kalanchoe Tom Thumb*. At that time we were only able to offer plants but we are now in a position to supply seed. On our front cover we show a colored illustration of two plants of this new variety as compared with the regular *Kalanchoe*.

The plant's dwarf compact habit, free flowering and keeping qualities make it most desirable for dish gardens, terrariums and novelty pots or filling in where a dwarf plant is desirable, the height over all being but 5 or 6 inches. Has the same bright scarlet clusters of bloom borne on short stems just above the foliage; leaves are small, being placed one on top of the other on closely jointed stems. Whether in flower or not the plant compares favorably with other succulents as a filler and it can be flowered early by the use of black cloth treatment:

PETUNIA GIANT DOUBLE MADONNA

Petunias

All Double Dwarf "Victorious" Strain

A strain of dwarf Petunias that gives practically 100% double flowers from seed, something every Florist has been looking for. Flowers are large ruffled and fringed in a splendid range of color. A dwarf compact grower, making it ideal for pots as well as for bedding. Due to the shutting off of imports from Japan, the seed we offer below is of 1940 crop. However, recent germination tests show that same is satisfactory, but of course under the circumstances, we cannot entertain any complaints on germination.

Amaranth Red. An extra dwarf variety of the Victorious strain with flowers of a bright amaranth red color.

Appleblossom. Plants are very dwarf with appleblossom pink flowers.

Blue Brocade. A silver medal winner in the 1941 All-America trials, Blue Brocade is a very dwarf plant with all double, true violet blue flowers. Especially valuable to the florist trade for pots and bedding, it is an important color addition to the Victorious strain of Petunias.

Gaiety. Color is Rose-Red and White with frilled petals. Flowers measure three to four inches across and the plant is just as dwarf and compact as a single form.

Loveliness. Flowers measure 4 inches in diameter and are of a clear pink color.

Orchid Beauty. Color is orchid or light lilac, heavily veined deeper lilac or violet.

Rosy Carmine (World Beauty). The ideal plant for pots and bedding purposes. Practically 100% double with large fringed flowers of a beautiful rose-carmine color. The plants make a very dwarf, compact growth and are very free flowering.

Pure White. This is one of the best double fringed white Petunias ever introduced.

Kalanchoe Tom Thumb

A dwarf variation of Kalanchoe Blossfeldiana that will become very popular when better known, being especially valuable for miniature dish gardens, terrariums, and wherever the use of a dwarf plant is necessary. This new plant has a free branching habit, small foliage so closely jointed that the leaves are practically on top of one another. Flowers are bright scarlet borne on short stems and instead of forming above the foliage, start at the base and envelop the plant.

The culture is simple, being similar to the regular Kalanchoe and responds to black cloth treatment for early flowering. Even when not in bloom the plant compares favorably with other succulents as a filler.

Lindig Soil Shredder

In these days of scarcity of men and higher wages any labor saving device should be a boon to the average florist. With a Lindig Soil Shredder you can easily shred and pulverize three to four times the soil that can be screened by hand in the same time. The soil as it leaves the machine is of about the same consistency as soil put through a ½ inch screen; however, the soil is lighter than if it had been

screened because the momentum of the beater drum creates a wind suction that blows the soil out and tends to fluff it. The machine is fool-proof, sturdily built and will keep two men busy throwing sod, soil, manure, peat or other material into the hopper.
